Dear Parent(s)/ Guardian(s),

Every year students are very uncertain as to their career choices. The following online assessment from RightCareers4Me has been used by many students and has been cited as being extremely helpful and beneficial to students. It is an award winning online career matching system which helps students to scientifically identify suitable careers and courses.

We are giving 6<sup>th</sup> year students the opportunity to complete this assessment in school and then access a printed report which will be available for them to discuss with their Guidance Counsellor at their upcoming guidance appointments as well as with yourselves at home.

Further information on this assessment is available at [www.rightcareers4me](http://www.rightcareers4me) which I would encourage you to read and research further.

The cost of the assessment is €50 and this includes a 2 hour assessment which will look at Interests, Aptitudes, Personality, Values and Skills as well as a hard copy of the report.

The 2 hour assessments will be carried out in single 1 hour sessions within the school timetable which will be organised in a manner to minimise disruption to students and teachers.

Please note that completing this assessment is **OPTIONAL** and students are not under any pressure to complete the assessment. It is only being offered as it may be of benefit to some students who are uncertain of their career choices.

If you have any queries in relation to this matter feel free to contact me,

Yours faithfully,

Aisling O'Dwyer  
Guidance Counsellor
